

Epipolar Geometry and NCC Matching

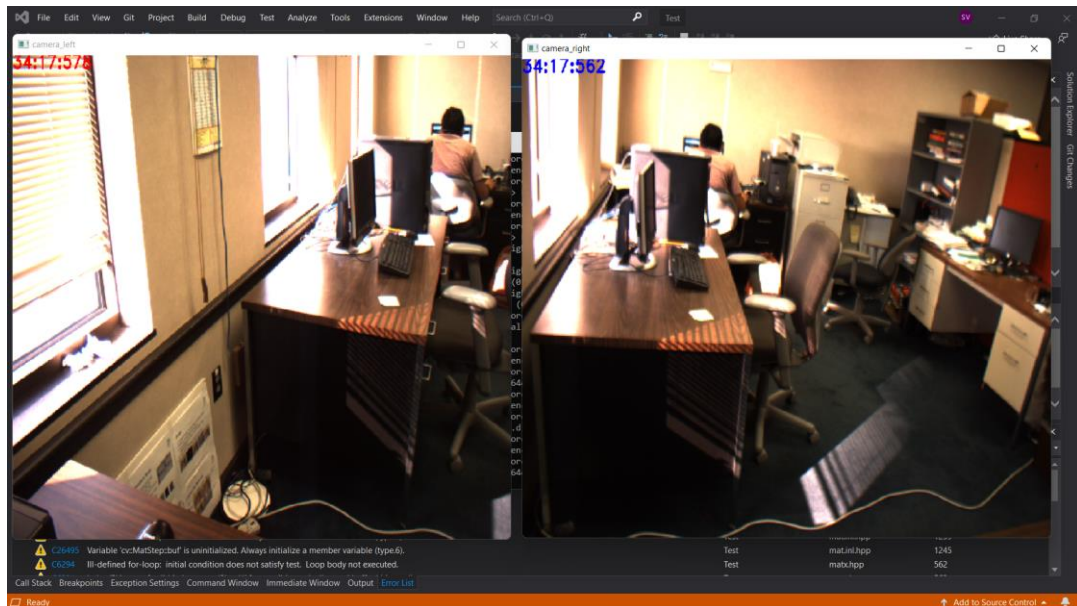

Name: Surya Venkatesh Vijjana

Student ID: 1017096070

Output:

Achieved:

1. Successfully Loaded the two-color images at once

2. Loaded Intrinsics and Extrinsics values to the OpenCV Matrix.
3. Calculated the Fundamental Matrix.
4. Generated the Epipolar line that passes through the correspondence on the right Image.
5. Generated the Left image patch based on the mouse click and right image patches along the epipolar line.
6. Successfully calculated the NCC value for each patch pair.
7. Successfully implemented NCC Matching to find the correspondence in right image.
